OBJECTIVE

MERN Stack Developer with hands-on experience building scalable full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Strong foundation in JavaScript, RESTful APIs, authentication, and responsive UI development. Experienced in creating highly interactive and animated web interfaces using GSAP and modern animation libraries. Proficient in Data Structures and Algorithms (DSA), problem-solving, state management, backend integration, Git, and clean coding practices.

EDUCATION

Oriental College Of Technology Bachelors of Technology in Computer Science and Engineering	2021 - 2025
Orion International School Senior Secondary (Class XII)	2021
St Josph Co-Ed School Secondary (Class X)	2019

SKILLS

- **Programming Languages** - JAVA, JAVASCRIPT
- **Frontend** - HTML, CSS, React, Tailwind CSS, Bootstrap, Gsap
- **Backend** - Node.js, Express.js, Firebase
- **Databases** - MongoDB(NoSql)
- **Tools** - Git, GitHub, VsCode, IntelliJ, Postman
- **Other** - Canva, Ms Word
- **SoftSkills** - Teamwork, Problem solving, Communication, Adaptable

PROJECTS

AI Code Reviewer | ReactJS,NodeJS,ExpressJS,GEMINI API,Tailwind CSS

- Developed a full-stack AI-powered Code Reviewer using React, Tailwind CSS, Node.js, and Express.js with Gemini API integration.
- Implemented a real-time code editor interface where users can paste source code for automated analysis and feedback.
- Integrated Gemini API to analyze code, detect logical errors, suggest optimizations, and improve code quality.
- Designed RESTful APIs for secure backend communication and ensured responsive, user-friendly UI with clean architecture.

Bookify| ReactJS,,Firebase, Tailwind CSS

- Built a full-stack e-book store application using React.js, Bootstrap, and Firebase (Authentication, Firestore, Storage) with Netlify deployment.
- Implemented Firebase Authentication, Firestore CRUD operations, and Firebase Storage for secure user login, book management, and file uploads.
- Configured multiple routes using React Router DOM to enable seamless navigation between book listings, uploads, details, and order pages while managing asynchronous data flow.

Scatch – E-commerce Bag Website | Backend Focused | Node.js + Express + MongoDB

- Developed a backend-focused e-commerce application using Node.js, Express.js, MongoDB, and MVC architecture, implementing RESTful routing and modular project structure.
- Built secure authentication and authorization system using bcrypt password hashing, JWT tokens, express-session, and protected routes with middleware.
- Integrated MongoDB with Mongoose for schema design, CRUD operations, data validation, and implemented product image uploads using Multer with secure environment configuration.

CERTIFICATIONS

- **Udemy** -FullStack Devlopment
- **Coursera** -Javascript for Beginners
- **Coursera** -Git for Developers Using Github
